

# Is Austria ON TRACK?

- Austria has achieved the interim target 2011/2012, but is slightly behind on the NREAP 2011 target due to a negative deviation in the electricity sector share.
- Compared to the prior six year average, growth was slower between 2010 and 2011. The transport sector even experienced negative growth.
- Growth rates are sufficient to achieve the 2020 target for RES overall and in the heat sector. In the electricity and transport sectors, growth needs to accelerate in order to achieve the 2020 target.
